Powder Inter-A

Intermediate Restorative Material

Inter-A Powder AF do BRASIL is a formulation based on Zinc Oxide modified and reinforced by polymers which, when joined to Inter-A Liquid, provides the product with easy handling characteristics, with faster hardening, high marginal sealing, compatible coloration, good compressive strength, sedative properties and biocompatibility (free from soluble arsenic). With these characteristics, in addition to bringing agility and a lower postoperative pain index, it allows a temporary restoration with greater durability.

INDICATION

Indicated for cavity lining, provisional sedative filling, provisional cementation of prosthetic parts, root canal fillings, surgical cementation and for long-term temporary restorations.

PRESENTATION

Bottle containing 38g of Powder Inter-A AF from BRAZIL.

n° 80432410036
