IonoFoto

Light-Cured Glass Ionomer

IonoFoto is a high-performance light-cured glass ionomer, indicated for dental applications requiring sealing, protection, and prolonged fluoride release. It offers excellent adhesion to the tooth structure, high mechanical strength, biocompatibility, radiopacity, and resistance to dehydration. It has an opaque yellowish consistency before polymerization and becomes rigid and translucent after light activation.

INDICATION

Indicated for cavity base/liner under restorative materials (amalgam, ceramic, or composites). Sealing of pits and fissures in small cavities. Restoration of small cavities and defects. Filling of small retentions in cavity preparations.

PRESENTATION

Box or Flow Pack with 1, 2, or 3 Syringes of 1g, 2g, 2.5g, 3g, 4g, or 5g / Box or Flow Pack with 1, 2, or 3 Syringes of 1g, 2g, 2.5g, 3g, 4g, or 5g and 5, 10, 12, or 15 tips.
