# Diamond Polishing Paste

Diamond Polishing Paste AF do BRASIL is universal, for use by dentists or prosthetics. It offers excellent results in the polishing and shine of porcelain, dental enamel, resins, composites and other restorative materials. As it is soluble in water, it facilitates the lubrication of the polishing process and the removal of the paste at the end of the treatment. It is a uniform product, with high hardness, good resistance and ideal for professional work.

## INDICATION

Indicated to be used in conjunction with felt discs or velvet discs, which enhances its action in polishing and finishing surfaces of restorative materials in general.

## PRESENTATION

Box with 1 (one) syringe containing 3g of AF do BRASIL Diamond Polishing Paste + 2 (two) applicator tips.

n° 80432410064
