# Condaaf Acid

## 37% Phosphoric Acid Conditioner Gel

Condaaf Acid AF do BRASIL is a low-viscosity phosphoric acid conditioning gel that does not flow from the applied site, also having thixotropic property. It has blue dye to facilitate visualization and control during application. It is a hydrophilic product as it has a good affinity for water, allowing easy removal after conditioning.

### INDICATION

Indicated for performing enamel and dentin acid etching, providing increased adhesion and retention of adhesive systems on the surface.

### PRESENTATION

Flow pack package with 3 (three) syringes containing 3g each of 37% Condaaf Acid + 3 (three) applicator tips.

n° 80432419007
