Sodium Bicarbonate

Sodium Bicarbonate AF do BRASIL is an abrasive powder of high purity and superfine granulometry, used for oral prophylaxis with bacterial plaque removal.

Sodium bicarbonate neutralizes acidity by directly fighting the proliferation of bacteria causing plaque and bad breath.

INDICATION

Indicated for use in sandblasting for the removal of bacterial plaque, due to the patients' difficulties in maintaining an efficient brushing that constantly maintains a low plaque index compatible with dental health. With its superfine granulometry, it provides ample blasting.

PRESENTATION

Bottle containing 100g, 200g or 500g of Sodium Bicarbonate AF do BRASIL. Natural or Strawberry Flavors.
