# Drill Cleaning Brush

The Drill Cleaning Brush AF do Brasil is produced with corrugated brass bristles, which does not damage the drills, and has a very resistant aluminum body.

## INDICATION

Ideal and indicated for cleaning dental drills before the autoclave process, removing dirt from the drills, helping to eliminate organic and inorganic matter (bio-film). The main phase of sterilization is cleaning and an instrument that was sterilized dirty will never be a sterile instrument.

## PRESENTATION

Blister containing 1 unit of Drill  
Cleaning Brush AF do Brasil.
