Stainless Steel Abrasive Strips

The Stainless Steel Abrasive Strips AF do BRASIL are produced in stainless steel and developed and intended for professional dental use.

The Abrasive Strips of Stainless Steel AF do BRASIL do not break and have a lot of flexibility, with a spectacular differential that is its NEUTRAL CENTER, non-abrasive, which facilitates the introduction into the Interproximal surfaces of the teeth, bringing greater precision and comfort to the patient.

INDICATION

Indicated for finishing and polishing proximal surfaces of restorations made with composites, acrylics, glass cement ionomers and amalgams.

PRESENTATION

Box containing 12 units measuring 4mm x 140mm or 6mm x 140mm of Stainless Steel Abrasive Strips AF do BRASIL.

n° 80432410019
